

Herbal medicine under threat!

From April 2011, I will not be able to prescribe many of the herbal medicines that you and others may need because of the lack of statutory regulation of our sector and new EU legislation.

The Government should act but so far has failed to do so.

You can help to save herbal medicine by...

- writing to Andrew Lansley MP, Secretary of State for Health, calling for immediate statutory regulation of our sector;
- contacting your MP with the same message.

Please ask me for details, or visit the website for the European Herbal and Traditional Medicine Practitioners Association
